Job Description

1 purpose...to reimagine medicine!

The Oncology Translational Research Team is looking for an experienced Scientist to join our Oncology Pathology and Biomarkers team in Cambridge MA.

The role designs, performs and analyzes cell & molecular biology studies using human tissues, xenograft models and cell lines, using techniques like Immunofluorescence microscopy, qPCR, westerns and other cutting-edge technologies.

Your responsibilities will include, but are not limited to:

- Independently design and perform experiments with a high degree of complexity, demonstrating expertise in a wide range of techniques (e.g., IF, cell culture, immunoblotting, qPCR).
- Be a self-starter and independently seek out opportunities to learn and contribute to within Oncology and the larger NIBR organization.
- Work collaboratively with others in the group and project team members.
- Communicate directly with project teams to design and execute experiments, and subsequently present and discuss results.
- Recognize problems and trouble-shoot.
- Represent the lab at project team meetings.
- Contribute to report writing and other publications.
- Active participation in supporting, teaching and learning from colleagues in the pathology and biomarker group.
- Fully understand and participate in the drug development process including reaching out to and working with early discovery and late development teams for project specific requirements.

Diversity & Inclusion / EEO

The Novartis Group of Companies are Equal Opportunity Employers and take pride in maintaining a diverse environment. We do not discriminate in recruitment, hiring, training, promotion or other employment practices for reasons of race, color, religion, gender, national origin, age, sexual orientation, gender identity or expression, marital or veteran status, disability, or any other legally protected status. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration and empowers our people to unleash their full potential.
