Job Description

769 million. That's how many lives are touched by Novartis products globally. And, while we're proud of that fact, in this world of digital and technological transformation, we must ask ourselves this: how can we continue to improve and extend even more people's lives?

The Senior Microbiologist is responsible for performing microbiological tests on media, pharmaceutical products, and raw materials in compliance with current GMP regulations, procedures and systems. Also responsible for performing Environmental monitoring in aseptic environment. Responsible for method validation, transfer, and improvements.

Your responsibilities include, but are not limited to:

- Perform and support Microbiological/Sterility testing, Environmental Monitoring testing and investigation and change control activities (deviations, OOS, OOE, OOT, CAPAs, trending).
- Ensure that QC testing is properly conducted and documented for all performed activities, with emphasis on Data Integrity.
- Provide oversight and monitoring of the microbiological program.
- Author, review and support procedures, investigations, corrective and preventive actions, change controls, complaints and training as it relates to microbiological testing and environmental monitoring.
- Support transfer projects, validation studies, method improvement and new equipment qualifications.
- Prepare and participate in health authorities' inspections and internal audits of QC. Ensure quality control area is inspection ready.
- Provide support to peers within the Quality Control and AS&T team.
- Support Quality Assurance, Quality Control and AS&T as a valued business partner, with a culture of safety, quality, delivery to patients, cost, compliance, and data integrity.
