### **Job Description**

108,000 associates reimagining medicine for more than 799 million people globally!

Do you think you can find and deliver “10x” innovation opportunities in Novartis Business Services? Your passion for innovation and ability to build and lead a high-performing global team of associates and digital ecosystem partners will help us re-imagine the next generation of NBS!

As the **Solution Design Expert (Associate Director)** you are a role model of Novartis Values & Behaviors: you care about patients, focus on what matters most, dare to challenge the status quo & experiment, take smart risks and always put your team before yourself. You are an inspiration to the associates who work with you. You foster a learning culture within your teams. You are a learner, not a knower, and you are genuinely curious and open-minded. You empower and support others, you create clear accountability, and you remove obstacles for your team. You spend time mentoring and coaching team members.

### **What will you be responsible for?**

- Represent IT to the business or IT groups receiving services, ensuring that expectations for IT services are met.
- Identify and qualify new demand with overall responsibility for steering proposals through the early phases of approval.
- Participate in the establishment of budgets and investment proposals and obtain sponsorship and funding.
- Create a detailed IT solution/service design, based on functional specifications, to meet quality and performance requirements and technical constraints.
- Develop, build, configure, customize, and unit test solutions based on the functional and technical specifications to meet quality and performance requirements.
- Hold end-to-end accountability for business processes, integrate services horizontally across organizational units, and manage interfaces between Service Delivery projects.
- Collaborating across boundaries Cross-Cultural Experience Organization Scope

### **Diversity & Inclusion / EEO**

*The Novartis Group of Companies are Equal Opportunity Employers and take pride in maintaining a diverse environment. We do not discriminate in recruitment, hiring, training, promotion or other employment practices for reasons of race, color, religion, gender, national origin, age, sexual orientation, gender identity or expression, marital or veteran status, disability, or any other legally protected status. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration and empowers our people to unleash their full potential.*

## Minimum Requirements

### What will you bring to the role?

- Big Data Technical knowledge
- Commercial processes Innovative & Analytical Technologies Data Management & Systems
- Good understanding and knowledge of pharma commercial domain
- Product delivery mindset & experience working in an agile environment
- Knowledge of project management models and techniques Influencing without authority
- Solid understanding of data management principles & methodology; working experience with AWS, cloud technology, snowflake, etc.
- 5-8 years of hands-on experience with data & analytics
- Degree in computer science, information technology, or related experience

### What you'll receive in return?

Competitive salary, annual bonus, long-term incentive for select levels, health insurance, paid vacation/holidays, potential flexible working arrangements, employee recognition scheme.

### Why consider Novartis?

799 million! That's how many lives our products touched in 2019. And while we're proud of that fact, in this world of digital and technological transformation, we must also ask ourselves this: how can we continue to improve and extend even more people's lives?

We believe the answers are found when curious, courageous, and collaborative people like you are brought together in an inspiring environment. Where you're given opportunities to explore the power of digital and data. Where you're empowered to risk failure by taking smart risks, and where you're surrounded by people who share your determination to tackle the world's toughest medical challenges.
