### **Job Description**

Our Salesforce team is 75 members strong and has a presence in key strategic locations globally. The Salesforce COE team works across a broad range of solutions spanning applications for internal business productivity to external applications for medical professionals and patients. With endless future opportunities in Digital Health, we are well positioned to build products that improve lives.

As an experienced test leader, you will be accountable for aligning the organizations overall test methodologies and approaches to our product squads, which you will oversee from test perspective. In this role, you will bring industry expertise, guide these squads accordingly, and execute in line with product development, agile and DevOps best practices.

- Accountable for the refinement and ongoing improvement of the test management strategy for the products and squads in scope
- Review, agree, implement and govern the standard execution of test strategies across all product developments and methodologies
- Drive the standard execution of each test phase (system, integration, functional, regression, acceptance etc.) per product
- Ensure all test related deliverables are created to quality in line with strategy and approach
- Formally review of Sprints testing periods including informal review, testing sign-off and quality assurance reviews focused on continuous improvement for agile testing strategy
- Engage all test management Product Owners and stakeholders ensuring ongoing alignment to strategy and execution
- Review and manage communication across the teams within test environments and, with delivery and development teams, test data and test related tooling in accordance with CoE and Novartis standards.

### **Minimum Requirements**

- Graduation / post-graduation in the relevant domain.
- 12+ years' experience in a similar role with a proven track record in Test Management.
- Deep knowledge of AWS Cloud technologies (IAM, Lambda, Cloud formation; Amplify and CDK are a strong plus) and desirable focus on authorization model
- Proven results managing test strategy within the delivery CI/CD solutions for highly integrated products
- Proven results testing and managing the bug fixing solutions for integrated products. Strong teamwork and interpersonal skills at all management levels
- Reporting of Test progress and issue fixing status to Test Leads and Manager.
- > 3 Years' experience in AWS DevOps testing practices. API knowledge and Mulesoft (Desirable). Salesforce Lightning experience proven (Desirable)

### **WHY NOVARTIS?**

769 million lives were touched by Novartis medicines in 2020, and while we're proud of this, we know there is

so much more we could do to help improve and extend people's lives.

We believe new insights, perspectives and ground-breaking solutions can be found at the intersection of medical science and digital innovation. That a diverse, equitable and inclusive environment inspires new ways of working.

We believe our potential can thrive and grow in an unbossed culture underpinned by integrity, curiosity and flexibility. And we can reinvent what's possible, when we collaborate with courage to aggressively and ambitiously tackle the world's toughest medical challenges. Because the greatest risk in life, is the risk of never trying!

Imagine what you could do here at Novartis!
