Job Description

Senior Manager Science & Technology DSP (m/f/d), Global Drug Development, Schafftenau/Kundl, Austria

17+ projects are within scope of biopharmaceutical downstream process development! Impact the future of downstream process development in Drug Substance Development within Technical Research and Development in Schafftenau. Join the downstream process development group and lead a team of 5+ associates. Bring-in your curiosity and inspiration to follow your way as a leader.

Your key responsibilities:

Your responsibilities include, but are not limited to:

- Lead and develop the DSP team
- Develop robust scalable processes with consistent performance and reproducibly achieve quality targets
- Lead and perform process transfers to pilot and manufacturing plants
- Coordinate activities in the context of downstream processing within project teams with internal and external partners
- You will optimally and flexibly use personnel and technical resources
- You will further develop and implement state of the art or future technologies
- You will compile high quality documents as part of international registration procedures
- You will assure and maintain high quality standards in the laboratory

Minimum Requirements

What you'll bring to the role:

- Sound technical & scientific knowledge of biopharmaceutical process development
- Experience in development of chromatography steps, normal flow and tangential flow filtration steps; proven ability to manage and prioritize multiple projects
- Prioritize and deliver against tight timelines,
- Knowledge of people management
- Leading diverse and multi-functional teams
- Knowledge on Health Authority regulations
- Excellent communication, presentation and management skills
- Role model for unbossed, curious and inspired leadership in Novartis

Desirable requirements:

- Master Degree in biotechnology, biochemical engineering, biology, chemistry, biochemistry or similar with at

least 4 years strong relevant industry experience or PhD in relevant field and at least 2 years relevant industry experience

- Fluency in English, German is a plus

Why Novartis?

769 million lives were touched by Novartis medicines in 2020, and while we're proud of this, we know there is so much more we could do to help improve and extend people's lives.

We believe new insights, perspectives and ground-breaking solutions can be found at the intersection of medical science and digital innovation. That a diverse, equitable and inclusive environment inspires new ways of working.

We believe our potential can thrive and grow in an unbossed culture underpinned by integrity, curiosity and flexibility. And we can reinvent what's possible, when we collaborate with courage to aggressively and ambitiously tackle the world's toughest medical challenges. Because the greatest risk in life, is the risk of never trying!

Imagine what you could do here at Novartis!

In addition to a market-competitive base salary, we offer an attractive incentive program, a modern company pension scheme, childcare facilities, learning and development options as well as worldwide career opportunities within the Novartis group. In accordance with Austrian law, we are obliged to disclose the minimum salary as stated in the collective bargaining agreement. For this position the minimum salary is € 52.204,04/year (on a full time basis). In most cases, the actual salary will be higher, as we strive to maintain a competitive position in the market and consider your previous experience, qualifications and individual competencies. job sharing models and support flexible working and home-office where possible.

Commitment to Diversity & Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse team's representative of the patients and communities we serve.

Our recruitment decisions are based on selecting the best person for the job, regardless of gender, religion, age, colour, race, sexual orientation, nationality or disability.
