

## **BS/MS Research Scientist, Oncology Pharmacology " >**

Job ID  
322694BR  
USA

### **Job Description**

One purpose – to reimagine medicine!

Novartis Institute for Biomedical Research (NIBR) is seeking a highly motivated scientist to join our Oncology Pharmacology group in Cambridge, MA. The successful candidate will join a dynamic, multi-disciplinary team of scientists and play a key role in advancing drug discovery projects as well as identifying novel therapeutic targets and approaches to benefit cancer patients. This position will require excellent in vivo and in vitro technical ability, a passion for data generation and analysis, eagerness for learning new things, and the ability to thrive in a fast-paced and highly collaborative work environment.

Your key responsibilities include, but are not limited to:

- Designing and executing in vivo rodent studies for PK/PD/efficacy assessment of pre-clinical oncology drug candidates
- Developing and characterizing novel in vivo models for oncology research
- Supporting functional genomic screens aimed at finding the next generation of cancer targets
- Developing, optimizing and performing cell-based assays for target identification and validation
- Critically analyzing and presenting study results within a multidisciplinary team environment

### **Diversity & Inclusion / EEO**

*The Novartis Group of Companies are Equal Opportunity Employers and take pride in maintaining a diverse environment. We do not discriminate in recruitment, hiring, training, promotion or other employment practices for reasons of race, color, religion, gender, national origin, age, sexual orientation, gender identity or expression, marital or veteran status, disability, or any other legally protected status. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration and empowers our people to unleash their full potential.*
