Your laboratory team is key in developing New Biological Entities as well as Biosimilars by performing a wide range of analytical activities ranging from method development to process analytics and performance of stability studies.

Your Responsibilities:

Your responsibilities include, but are not limited to:

- Aim for five bullet points
- Independently plan, organize, perform and document scientific experiments in a development environment
- Critically evaluate results and draw relevant conclusions
- Write technical protocols, scientific development reports or lab procedures based on templates or SOPs
- Contribute to development and implementation of new technologies
- Lead and manage project activities, and contribute to overall strategies and goals within a project team

Minimum Requirements

What you'll bring to the role:

- University degree (e.g. Master Chemistry, Pharmacy, Biotechnology) with at least 2 years of work related industrial experience
- Thorough understanding of analytical techniques, e.g. HPLC, CE and protein chemistry
- Experience with analytical method development
- Experience within biologics drug product development beneficial
- Very strong communication skills in English, German beneficial

Desirable requirements:

- Experience with working in a matrix organization desirable

Why consider Novartis?

799 million. That's how many lives our products touched in 2019. And while we're proud of that fact, in this world of digital and technological transformation, we must also ask ourselves this: how can we continue to improve and extend even more people's lives?

We believe the answers are found when curious, courageous and collaborative people like you are brought together in an inspiring environment. Where you're given opportunities to explore the power of digital and data. Where you're empowered to risk failure by taking smart risks, and where you're surrounded by people who

share your determination to tackle the world's toughest medical challenges.

We offer a market-competitive base salary in line with your qualification, experience and individual competencies. Additionally we offer an attractive incentive program, a modern company pension scheme, childcare facilities, learning & development options and worldwide career opportunities within the Novartis group. The base pay is composed of a market oriented excess payment and the respective amount according to the Austrian collective agreement (at least € 51.180,50 per year on a full time basis)

Imagine what you could do at Novartis!

Novartis is an equal opportunities employer and welcome applications from all suitably qualified persons.

Commitment to Diversity & Inclusion:

Novartis embraces diversity, equal opportunity and inclusion. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration, and empowers our people to unleash their full potential.

Join our Novartis Network: If this role is not suitable to your experience or career goals but you wish to stay connected to learn more about Novartis and our career opportunities, join the Novartis Network here:
