Bring your skills and help transform the future of health.

Product Management
Work cross-functionally to drive forward products from conception to launch by connecting technical and business partners as a product owner, product manager, or solution delivery lead at Novartis.

**Data Strategy**

Bring your passion for data governance and architecture to clean, link and build data pipelines that allow for scalable extraction and analysis.

**Video of Meet Anna, Director, Bioinformatics and Analytics**

**Data Engineering**

Collaborate with business partners to understand analytics needs, and use your big data skills to provide analytical solutions to internal clients.

**Digital Marketing**

Help drive new ways of reaching and interacting with internal and external partners through digital channels.

**Data Science**

Coordinate, mine, and analyze large amounts of data to drive optimization across the enterprise.

**Developer**

Build and create software and applications that support Novartis’ digital ambitions.

---

Our journey towards reimagining medicine brings extraordinary opportunities.
