

Novartis Healthcare Partnering Week 2021 ^[1]

Novartis values the health of its associates and partners.

From January 11th to January 15th, in lieu of face to face meetings that normally take place at this time of year, our associates have freed time to meet partners virtually through a dedicated partnering platform. Not only does this ensure responsible practice, but we believe that this will give us greater flexibility and an opportunity to have richer, deeper conversations to kick off the year.

To find the appropriate professional to start a dialogue with Novartis, we invite you to go [here](#) ^[2].
