

## **Postdoc Program Leadership** <sup>[1]</sup>

The NIBR Postdoctoral Program is led by a Global Steering Committee that is chaired by the President of NIBR and involves senior scientific leaders. This group approves NIBR mentor applications and oversees overall direction of the program.

The local Postdoctoral Steering Committees review NIBR mentor applications and help create a vibrant local postdoctoral research community, engaging both NIBR mentors and postdoctoral scholars through scientific seminars, experimental design classes and mentoring/leadership workshops, among others.
