Our response to COVID-19

In the face of a global crisis, Novartis quickly mobilized research and development capabilities, manufacturing capacities, clinical trial expertise and philanthropic aid to address the COVID-19 pandemic.

Vaccination production and collaborating with partners

We are helping to support the global supply of vaccines and therapeutics. By leveraging our production facilities we support vaccine demand around the world. Novartis is partnering with multi-stakeholder consortia, including the COVID-19 Therapeutics Accelerator, coordinated by the Bill & Melinda Gates Foundation, the Wellcome Trust and Master-card, as well as a partnership supported by the Innovative Medicines Initiative. We are participating with the University of California, Berkeley, and other pharmaceutical companies to develop an antiviral molecule to potentially treat all coronaviruses, including the virus that causes COVID-19.

Clinical investigations

We played our part in the scientific effort to find treatments for COVID-19. We quickly designed and launched three Phase III, placebo-controlled trials to determine if our products could help patients with certain COVID-19-related symptoms. We provided these and other medicines to investigator-initiated trials and launched access programs upon request. We are also collaborating with Molecular Partners to develop two potential antiviral treatments for COVID-19 based on a new class of protein therapeutics known as DARPin®.

Access and pricing commitments

Novartis is making 15 drugs that treat key symptoms of COVID-19 available to low-income and lower-middle-income countries at zero profit until a vaccine or curative treatment is available. Our Sandoz Division is maintaining prices on a basket of essential medicines that may help in the treatment of COVID-19.

Community funds

Novartis committed to donating up to USD 40 million to support communities around the world impacted by the pandemic. This includes the Novartis COVID-19 Response Fund and a US COVID-19 Community Response Fund, established by Novartis and the Novartis US Foundation, that will provide cash and in-kind donations for immediate response and recovery efforts related to the pandemic in the US.

Supporting our associates

We took steps to support our associates and their families as they adapted to new conditions and commitments such as working remotely, educating children at home, and caring for loved ones. We provided additional paid leave and enhanced childcare support for associates in critical roles who needed to be on site. We announced a new global policy to give office-based associates more flexibility to choose how, where and when they work.
