

Novartis Patient Assistance Foundation

Gilenya Income Requirements

To be eligible for assistance from the Novartis Patient Assistance Foundation (NPAF), you must meet the income guidelines, which vary by product and household size. Depending on the Novartis medication you were prescribed, your income cannot be more than what is shown in the table below for your household size. NPAF considers the current Federal Poverty Level Guidelines in determining the annual income limits; these limits are subject to change. Please note, you will need to submit the first two pages of your household tax return to confirm your income.
